

PRESERVING OUR LEGACY 100 YEARS OF CDF PROTECTING OUR FUTURE

CDF ENGINE - MODEL 19

USE

The Model 19 is an enhanced version of the Model 9 fire engine. Additional compartment space, a fully enclosed cab, a full size ladder, and increased pump capacity were incorporated to enhance the engine's urban interface capabilities, while still retaining some of the engine's compactness for off-road use. The Model 19 allows the Department the advantage of providing fire protection in and around rural areas, as well as in the wildlands. Currently CDF has two Model 19 engines in service.

CREW

Seating for five personnel

CAPABILITIES

Tank: 600 gallons
